

**CS**™ **Acrovyn**® Wall & Door Protection

*Healthy  
wall protection  
can still be  
beautiful.*

# Having trouble figuring out which wall protection is safe for the environment?

## Not with Acrovyn®!

Acrovyn 4000 contains no halogens, monomers or other known persistent bioaccumulative toxins (PBTs) and is UL Class A/1 fire rated and labeled.

That's because some manufacturers are making environmental claims that will confuse you. Not us. Acrovyn 4000 was thoroughly tested by McDonough Braungart Design Chemistry (MBDC), who offers one of the industry's most comprehensive third-party environmental evaluations. MBDC analyzed all Acrovyn 4000 components to 100 parts per million (not just the base resin) and found that they contain no PVC, PBTs or other harmful chemicals\*. C/S is committed to selling only Acrovyn 4000 while other wall protection manufacturers continue to sell PVC and are unwilling to disclose what chemicals their product options contain. In addition

to material health, MBDC also evaluates other aspects of how a company operates including material reutilization, renewable energy use, water stewardship and social responsibility before a product is certified. The result: Acrovyn 4000 is the only wall protection system that is MBDC Cradle to Cradle Certified™ Gold or Silver. Dedicated to environmental leadership,

C/S is committed to developing products that have no negative impact on buildings and their occupants and has voluntarily been ISO 14001 certified. So if protecting people is as important as protecting your walls, choose Acrovyn.

*\*See test results at [www.c-sgroup.com/acrovyn/results](http://www.c-sgroup.com/acrovyn/results)*

### Environmental Achievements

C/S was awarded Practice Greenhealth's Champion for Change Award for the past three years and EPA's 2011 Mid-Atlantic Environmental Achievement Award. Acrovyn 4000 was recognized as one of the Top 10 Green Building Products of 2010 by Sustainable Industries magazine and won Architectural Products' 2011 Product Innovation Award.

### "Imagine: Cancer treatment centers built without materials linked to cancer..."

Inspired by this statement from Green Guide for Health Care, C/S is offering Acrovyn 4000 SM-20 corner guards in the new #235 Pink Ribbon color. A portion (10%) of the proceeds from "Project Pink" will benefit the National Breast Cancer Coalition Fund. ([www.BreastCancerDeadline2020.org](http://www.BreastCancerDeadline2020.org))

# Designers and owners love Acrovyn® 4000's new texture.

*The new texture is easier to clean and maintain.*

We understand that people use wall protection because they need it, but we also know how important aesthetics are to our customers. **Acrovyn 4000 now has a contemporary new texture that designers and owners overwhelmingly prefer over other companies' wall protection with pebblette texture.** Owners find the reduced surface texture much easier to clean and maintain. Acrovyn 4000's new texture also improves color consistency between the end cap and profile and makes our Chameleon simulated wood and metal patterns more realistic than ever. Yet another advancement from C/S, the inventor and leader in modern wall protection for over 40 years.

Which simulated wood looks more realistic to you?

Acrovyn® 4000 Wall Guard

Competitor Wall Guard

Acrovyn® 4000's contemporary new texture, or...

everyone else's pebblette texture?

You decide.

# Introducing Acrovyn® 4000 Chameleon™ Simulated Wood and Metal Collection

*Now PVC-free and even more realistic*

Acrovyn Chameleon™ offers the industry's best looking, most durable simulated patterns available today. **The Chameleon's patterned ink and base material are completely free of PVC,** and Acrovyn 4000's new contemporary texture makes **our wall guards look even more realistic.** The smooth texture is easy to clean. Chameleon is 20 times more durable than stained wood.

*Our tough, easy to clean Chameleon Collection is available on most of our products, including doors, wall coverings, wall guards and wall panels, ensuring a totally coordinated look for your interior.*

*Our exclusive fusion bonding process means Acrovyn 4000 simulated wood patterns won't wear, scratch or peel off. It becomes integral with the Acrovyn material.*

*Acrovyn Chameleon's surface cleans easily with non-abrasive cleaners.*

*Acrovyn Chameleon patterns are 20x more durable than stained wood and 4x more durable than laminate.*

**Inova Alexandria Hospital**  
*Architect: RSG Architects  
Amber Cherry and  
Classic Maple Wall Panels*

*All Chameleon patterns for Acrovyn wall guards and wall coverings are MBDC Cradle to Cradle Certified™ Silver.*
